## Professional Summary

Front-end developer crafting responsive web experiences using HTML, CSS, and JavaScript. Focused on intuitive design and performance.

Currently learning React.js to expand my ability to create reusable and modular UI components. Passionate about learning and delivering polished, accessible front-end solutions.

## Skills

HTML, CSS, JavaScript, React, Tailwind (utility-first framework)

## Project Experience

FrontEnd battle - IIT Bhubaneswar | Apr 2025

- Built an animated web interface in a 4-hour challenge.

- Used scroll-based triggers for dynamic transitions and smooth user experience.

[View Project](#)

AWS Cloud Club Website | 2025

- Collaborated with team members to design and develop the official website for the AWS Cloud Club at Medicaps University.

- Focused on clean UI, responsive layout and team-based development.

[View Project](#)

Fylaa Landing-Page Clone | 2025

- Cloned Fylaa's landing page with pixel-perfect accuracy.

Focused on responsive design and lightweight CSS.

[View Project](#)

Portfolio Template | 2025

- Designed a personal portfolio template optimized for performance, SEO, and modular customization.
